

BOARDING CONSENT FORM

When your pet boards with us, we offer a healthy Gastrointestinal Diet* that meets the nutritional requirements of pets of all life stages. Bedding and/or towels will also be included in his/her kennel during the stay.

*If your pet is on a special and/or prescription diet, we ask for you to bring your pets food.

Please note, for the health and safety of all our patients, all pets being boarded must be current on required vaccinations and all vaccinations must have been administered by a Licensed Veterinarian. This includes Rabies within the last year, Bordetella within the last 6 months (canine only), DHPP (given within the last 3 years for canines over 1 ½ years of age) and FVRCP within the last year (feline only).

Flint Veterinary Clinic is a flea-free zone. All pets with fleas will be treated while boarding in our facility at the owners expense.

We strive to make your pet feel as comfortable as possible, but sometimes pets can become stressed. By signing below, you give Flint Veterinary Clinic permission to give medications for stress colitis and/or anxiety if these medications are needed at \$3.00 charge per day.

For your convenience you may pick up your pet on the weekend by prepaying your invoice and a \$25.00 cash pick-up fee, for the technician who will assist you that weekend (the \$25.00 fee will be refunded if your pet stays until the following business day).
